

Project Engineer

Reporting to	Product Development Manager
The company	Brigade is a trusted, multi-award-winning global market leader developing innovative vehicle safety systems, for commercial vehicles and mobile machinery. Our cutting-edge solutions prevent collisions and save lives. Our company culture is defined by ACTION, and these values are at its core. We are Aspirational, We are Customer Centric, We are One Team, We Innovate, We Own It, Now. These values serve as guiding principles that shape the culture and behaviour of the organisation. These values encompass integrity, innovation, teamwork, customer focus and a commitment to excellence.
Purpose of Role	Lead the Quality Department. Lead the compliance/conformance and management of the PLC's and subsidiaries companies Business Management system (ISO 9001, ISO 14001 & ISO 45001), future iterations and other associated standard which facilitate the company's ability to improve its business.
Key Responsibilities	This Project Engineer position will be mainly focused on the introduction of Brigade's core commercial vehicle safety and efficiency product range. The candidate will need basic knowledge of the product technologies & introduction and project management. The role is based in the Research & Development and Technology Department, responsible for upgrades and product introduction, development & verification of Brigade's product portfolio. This position will be predominantly at product level, requiring good understanding of defining and managing requirements, supporting product development, verification and validation. The role requires the application of technologies and engineering methods keeping Brigade's product portfolio competitive and up to date, whilst enhancing its cost effectiveness. The successful candidate will also be required to support the Programmes and Product Support department in adapting current products for specific customer demands. The role will be primarily supplier-facing, managing multiple suppliers and manufacturers in both high and low-cost countries, overcoming cultural and language barriers to deliver new product in time for market. The position also extends to supporting our customers as needed. The applicant will ideally have knowledge of automotive technology including standards and quality controls which are key to ensuring Brigade's product quality standards are met, however on-the-job induction and training will be provided.

The ideal candidate will be required to have a proactive approach delivering products into the market in line with Brigade's business needs and customer & supplier relations.
