

Related Products – Scania Adapter for the Digital Dash 2024 Onwards

The Scania Adapter AC-24-12(011) (5760) is available and only compatible with the DDU (Digital Driver Interaction Unit) and is located in the passenger area in the cab; see photos below of the DDU and the Camera 1 port pin connector.

Note: A **Scania Engineer** is required to program the Scania system using the **Scania Workshop Suite (SWS)** software.

CONNECTING INTERFACE FOR CAMERAS

- The connecting interface for cameras is located on the bottom of the DDU control unit
- DDU ECU is located in the passenger footwell, behind Central Electric Unit (P2)

The connection to a camera, MDR and the Scania DDU is as follows:

Scania DDU -> AC-069 (5318) -> AC-24-12(011) (5760) -> Camera/MDR.

The Scania DDU/Adapter is mostly compatible with CVBS cameras, but for the use of AHD cameras, A MDR will have to be installed. The CVBS resolution will need to be reprogrammed, CAM1 video format needs to be reassigned/programmed to **PAL(720 X 576)** and Camera 1 to **General Camera**.

This can only be done by the **Scania Engineer** using the **SWS** software.

Note: Non-Scania products are not compatible with this Adapter cable.

Digital driver interaction control unit	Value	Unit	Factory setting
General camera, camera 1, video format	PAL (720x576)	-	None
Front view camera, camera 2, video format	None	-	None
Rear view camera, camera 3, video format	AHD (1280x720)	-	AHD (1280x720)
General camera, camera 1	General camera	-	None
Front view camera, camera 2	None	-	None
Rear view camera, camera 3	Rear view camera	-	Rear view camera
General camera, camera 1, locked	Unlocked	-	Unlocked
Front view camera, camera 2, locked	Unlocked	-	Unlocked
Rear view camera, camera 3, locked	Unlocked	-	Unlocked
