CMS - BN360-300 Camera Adapted to Work on BN360-200

Related Products – BN360-200

Product BN360-200 is no longer available and related components of this system are no longer supported as a spare part or replacement. For replacement of the BN360-200 system please contact customer services on 01322420300 (push option 1) and request details for current supported alternatives.

For a period of 2 years (end date 31st Dec 2027), the camera replacement kit is available to support existing BN360-200 systems. This solution provides a replacement camera where a new 200-camera is needed.

(Kit Part/model number) includes the following items:

- **BN360-1000C (100) kit, Wedge, Screws & Tech Tips (Silver): BN360-1000C (103) (8335)**
- **BN360-1000C (100) kit, Wedge, Screws & Tech Tips (Black): BN360-1000C (104) (8336)**

There is a difference of 15° in the viewing angle between the BN360-200-camera and the replacement camera provided above, use wedge provided when replacing a single camera. The image may be of a slightly poorer quality than the existing camera and there is also a difference in the position the cable exits on the back of the camera, and the mounting holes are 2mm different.

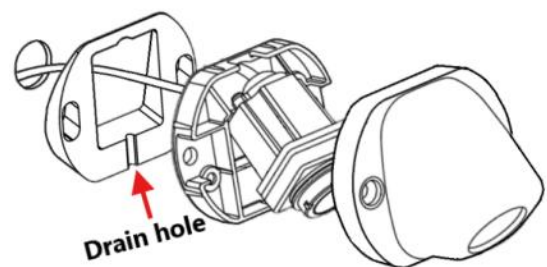

Calibration should be performed wherever possible. The supplied wedge helps reduce the need for calibration. The user must have a calibration tool compatible with the existing ECU. After installation, you must check for **blind spots**.

To support optimal performance of the BN360-200 after replacing the 200-camera follow the guidance provided in the user guide manual using the QR Code.

- Section 6 - calibration
- Section 7 - Surrounding view image blends
- Section 8 - Checking System functionality

When fitting the camera and wedge, ensure the drain hole is positioned downward, as shown in the image.

Note: There is a difference in image characteristics when the BN360-100C (4485) is compared to the BN360-1000C (100) (8321) with no impact to suitability as a replacement. The expertise of the fitter and judgement are essential for the installation.
