

## MDR - Formatting Storage Types

### Related Products – Mobile Digital Recorder MDR-500 Series

Brigade recommends, when fitting a new MDR system or Hard Disk Drive (HDD), the storage systems are formatted within the vehicle.

There are two main storage types; HDD and SD Card. Although, if connected, there is also an SD(FPB) Fire Proof Box (Fig. 2) and a Front USB. (See circled section in Fig 1). They are all accessed via the **Maintenance** tab on the MDR Menu. From here click on **Storage** and the screen menu in Fig. 1 will be shown.

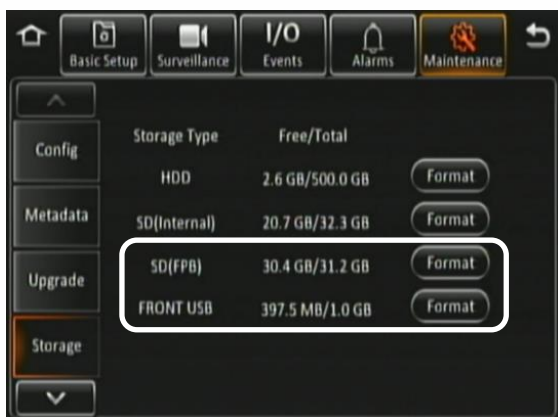

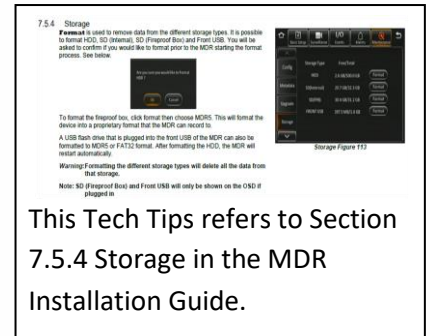

Fig. 1 Storage Menu Screen

Once the format button is clicked a confirmation box will appear to make sure it is intended. On clicking **OK** the selected storage type will be formatted. When formatting is completed a **Formatted successfully!** box will appear, click **OK** to finish.

This Tech Tips refers to Section 7.5.4 Storage in the MDR Installation Guide.

To format the Fire Proof Box or Front USB, please refer to **Section 7.5.4 - Storage** in the **MDR Installation Guide**.

**Warning: Formatting the different storage types will delete all the data from that storage device.**
