

Job Specification

Position	Product Development Engineer
Reporting to	Product Development Manager
Purpose of Role	<p>This Product Development Engineer position will be mainly focused on the development of Brigade's core commercial vehicle safety and efficiency product range with a strong bias toward electronic engineering. The candidate will need basic knowledge of the technologies behind these products with good knowledge of the associated engineering principles.</p> <p>Provide both product design and project management capability and assist the Product Development Team in upgrades and new product design, development & verification of Brigade's Product portfolio.</p> <p>This position will be predominantly at product level, requiring good understanding of defining and managing requirements, electronic & mechanical design, product verification and validation. The role requires the utilisation of cutting edge technologies and engineering methods keeping Brigade at the forefront of technology and enabling Brigade to better manage and control its intellectual properties, whilst enhancing its cost effectiveness. As part of the Engineering Department the successful candidate will also be required to support the Quality team and Application team in adapting current products for specific customer demands.</p> <p>The role will be primarily supplier-facing, managing multiple suppliers and manufacturers in both high and low-cost countries, overcoming cultural and language barriers to deliver new product in time for market. The position also extends to supporting our customers as needed.</p> <p>The applicant will ideally have knowledge of automotive electronics design standards and quality control principles which are key to ensuring Brigade's product quality standards are met.</p> <p>The ideal candidate will be required to have a proactive approach promoting Brigade's business ideals and customer / supplier relations while enhancing the Engineering team's technical knowledge.</p>

<p>Key Responsibilities</p>	<p>Functional:</p> <ul style="list-style-type: none">) Lead and manage product development throughout the product lifecycle) Supplier liaison and management) Requirements and engineering specification creation) Product design and design for manufacturing) Product verification and validation) Preparation of detailed component technical drawings, documentation and user manuals.) Aid the customers, sales and marketing on technical solutions and products support <p>Technology</p> <ul style="list-style-type: none">) LED and LCD display design and Cameras) Video and audio processing & interfaces) Digital video & audio recording) Ultrasonic sensing) Acoustic alarms) Analogue and digital circuit design and development) Micro & digital signal processing systems) Digital communication protocols e.g. CAN, I2C, SPI, RS232 or similar.) Software & hardware interface & software engineering) PCB level troubleshooting and product fault finding
<p>Working Relationships</p>	<ul style="list-style-type: none">) Team working, and co-operation with all colleagues) Direct communication with and support to colleagues and suppliers especially from the Far East.) Participate and lead in team meetings, training courses and workshops) Close links with staff will need to be developed and maintained in order to meet corporate objectives) Required to present a positive and professional image at all times.) Ensure that an excellent supplier / customer relationship is established and maintained at all times.

Person Specification

Essential	Desirable
<p>Education and Training</p> <ol style="list-style-type: none"> 1. Bachelor of Engineering in Electronics product development or similar Alternative educational background combined with solid professional experience (mandatory) 2. 5-6 GCSE's at Grade B or above including Maths, Science (Physics) and English 3. High level of numeracy and literacy 4. Above average computer literacy 	<ol style="list-style-type: none"> 1. Master of Engineering in Electronic product development or similar.
<p>Experience and Skills</p> <ol style="list-style-type: none"> 1. 3 years Industry practical experience with electronics product development (mandatory) 2. Able to demonstrate co-ordination skills 3. Attention to detail is critical 4. Knowledge of analogue and digital electronics including micro processing, DSP, video signal processing 5. Knowledge of camera, optics, acoustics, LCD's and digital recording technologies 6. Computer application skills: <ul style="list-style-type: none"> - Microsoft Outlook, Word, Excel - Ele. & mech. CAD development tools 	<ol style="list-style-type: none"> 1. ≥ 3 years' experience and knowledge in LCD, camera, optics, acoustics and digital recording technology within the automotive product development field. 2. Knowledgeable of modern automotive electronic architecture communication systems 3. Genuine interest in modern technology preferably with in the automotive industry 4. Computer application skills: AutoCAD 2D, Electronic circuit simulation programs
<p>Personality and Motivation</p> <ol style="list-style-type: none"> 1. Practical aptitude with methodical approach to detail 2. Self-motivated and takes full responsibility for the quality of own work 3. Flexibility to multi-task 4. Resourceful to provide technical support 5. Able to work to deadlines 6. Eager to learn 7. Natural respect for company and colleagues 	

<p>Interpersonal Skills</p> <ol style="list-style-type: none"> 1. High level of communication skills with the ability to communicate effectively with customers, management and colleagues. Clear spoken English is critical 2. Helpful and approachable 	<ol style="list-style-type: none"> 1. 2nd language conversant in Mandarin or Cantonese 2. Delivering excellent customer service
<p>Other requirements</p> <ol style="list-style-type: none"> 1. Experience in handling own time and priorities 2. Flexibility to work beyond normal business hours when required
